BREAKING NEWS

How to remove Graphene, which is being transmitted from the COVID Vaccinated to the Unvaccinated, from your body

BY THE EXPOSÉ ON SEPTEMBER 7, 2022 • (51 COMMENTS)

Listen to this article now

-12:48

51

Graphene oxide, a substance that is poisonous to humans, has been found in the Covid 19 “vaccines”, in the water supply, in the air we breathe through chemtrails, and is even in our food supply. Graphene oxide interacts and is activated by electromagnetic frequencies (“EMF”), specifically the broader range of frequencies found in 5G which can cause even more damage to our health.

The symptoms of graphene oxide poisoning and EMF radiation sickness are similar to those symptoms described as Covid. The good news is, now that graphene oxide has been identified as a contaminant, there are ways to remove graphene oxide from our bodies and restore your health.

WE URGENTLY NEED YOUR HELP: We've been censored. had our funds seized. and The Establishment has

This is a holistic approach of using several different methods simultaneously for the best effect. Including, specific supplements to degrade the graphene oxide in the body, and controlling EMFs in the environment to minimize graphene oxide activation.

This information comes from several sources and is based on scientific studies. Links are reference below.

Understanding Glutathione

Glutathione is a substance made from the amino acids: glycine, cysteine, and glutamic acid. It is produced naturally by the liver and involved in many processes in the body, including tissue building and repair, making chemicals and proteins needed in the body, and for the immune system. We have a natural glutathione reserve in our bodies. This is what gives us a strong immune system.

When glutathione levels are high in the body, we have no problems and our immune system functions well. But when the amount of graphene oxide in the body exceeds the amount of glutathione, it causes the collapse of the immune system and triggers a cytokine storm. The way that graphene oxide can rapidly grow to exceed glutathione in the body is by electronic excitation. Meaning, EMF's that bombard the graphene to oxidise it, which rapidly triggers the disease.

At the age of 65 glutathione levels fall drastically in the body. This can explain why the population most affected by Covid-19 are the elderly. Glutathione levels are also very low in people with pre-existing conditions such as diabetes, obesity, etc. Likewise, glutathione levels are very high in infants, children and athletes. This can explain why Covid-19 has not affected these people.

Graphene oxide when oxidised or activated by specific EMF frequencies overruns the body's ability to create enough glutathione, which destroys the immune system and causes the illness. In events of illness (such as Covid symptoms and all the "variants") it is necessary to raise glutathione levels in the body in order to cope with the toxin (graphene oxide) that has been introduced or electrically activated.

ICU Intubated Covid Patients Healed Within Hours When Treated with Glutathione And NAC, Example from Ricardo Delgado

"We have seen clinical trials with hundreds of patients who were in the ICU, on a respirator and intubated, practically on the verge of death. With bilateral pneumonias caused by the spread of graphene oxide and subsequent 5G radiation in the lung plaques. Well, this diffuse stain in these patients is symmetrical, which would not happen with a biological agent since it would be rather asymmetrical, as for example when there is a pneumococcal

N-acetylcysteine (“NAC”) is a supplement that causes the body to produce glutathione, it is known as the precursor to glutathione and causes the body to secrete glutathione endogenously, just as it does when you do sports intensely. NAC comes from the amino acid L-cysteine and is used by the body to build antioxidants. Antioxidants are vitamins, minerals, and other nutrients that protect and repair cells from damage. You can get NAC as a supplement or a prescription drug.

Zinc in combination with NAC are essential antioxidants used to degrade graphene oxide. Ricardo Delgado states that with these two antioxidants he has personally helped people affected by magnetism after inoculation. This is in people with two doses of Pfizer who have become magnetic and after these supplements they no longer have this symptom.

Other supplements that can be taken to assist in the removal of graphene oxide are:

- Astaxanthin
- Melatonin
- Milk Thistle
- Quercetin
- Vitamin C
- Vitamin D3

For more information on these supplements for graphene oxide removal please see this [LINK](https://www.holistichealthonline.info/product/graphene-removal/) (<https://www.holistichealthonline.info/product/graphene-removal/>).

Understanding The Connection Between EMF, 5G, Graphene Oxide, Hydrogels and Covid

Graphene oxide is activated by EMF, specifically the frequencies that are part of the 5G spectrum. All materials have what is known as an electronic absorption band. An absorption band is a range of wavelengths, frequencies or energies in the electromagnetic spectrum which are characteristic of a particular transition from initial to final state in a substance. This is a specific frequency above which a substance is excited and oxidises very quickly. Frequencies beamed at human beings that have a build-up of graphene oxide in their body can cause the graphene oxide to multiply very rapidly, breaking the balance of glutathione and causing a cytokine storm in a matter of hours.

Graphene oxide is the main ingredient in DARPA patented hydrogels. It is these hydrogels that are in the Covid injections, the PCR test swabs and the masks. A conductive hydrogel is a polymer like material that has substantial qualities and applications. They are developing different kinds of conductive hydrogels that are being used in many things, in our food, our water, and injected into our bodies in vaccines. Conductive hydrogels contain nanotech that locks on to your DNA and can be controlled by 5G sensors. They allow for DNA collection and manipulation. Conductive hydrogels allow for tracking and

Summary of Hydrogel & Quantum Dot Nanotechnology Characteristics – Click to Download (<https://www.ftwproject.com/wp-content/uploads/2020/10/Summary-of-Hydrogel-Quantum-Dot-Nanotechnology-Characteristics.pdf>)

It is from these studies that we can summarise some of the characteristics of conductive hydrogels.

Characteristics of conductive hydrogels: self-recoverability, electrical conductivity, transparency, freezing resistance, stretching, self-healing, stimuli responsiveness which means it does certain things when 5G hits it (or other frequencies for that matter).

We are surrounded in EMF radiation from cell phones (or mobile phones), TV's and Wi-Fi. Many areas are also turning on 5G and there have been investigations done showing the correlation between the 5G networks and the Covid outbreaks in an area. To best protect yourself from graphene oxide poisoning and the activation of graphene oxide in your body it is necessary to do several things to limit your EMF exposure.

Some suggestions on how to do this include: do not live in a city with a lot of towers if you can help it, turn off your Wi-Fi at night and stay away from smart meters and other smart devices if at all possible. Another option is to use EMF protection products such as orgone energy devices to help transform the EMF radiation to mitigate the harmful effects.

Orgone Energy, EMF Protection and Graphene Oxide

Since graphene oxide is activated by EMF, you want to create a protective barrier in your immediate environment that mitigates the EMF so that it does not activate the graphene oxide. In the 1930's a discovery was made that can be applied today to help with EMF protection. During a series of experiments, the late [Dr. Wilhelm Reich](https://wilhelmreichmuseum.org/about/biography-of-wilhelm-reich/) discovered that living samples placed within containers made from alternating layers of steel and non-conductive organic material were able to harness healthy “cosmic energy” from the environment. He called this energy “orgone.” These orgone accumulators and had the ability to: preserve blood samples for longer periods of time; sprout healthier plant seedlings; and, provide pain relief for his patients who sat inside them.

Today, instead of using sheets of steel and plastic we use a composite made from a blend of iron oxide, steel, brass, shungite and crystal powders encased in epoxy resin. The end result is a harmoniser that is able to transform the harmful wireless fields from cell towers, smart meters, smartphones, internet router and your television, into more beneficial energy for you and your plants and pets. The effects of this scientific phenomenon were replicated and well documented in studies done by the University of Pennsylvania and the Heraclitus Microscopic research laboratory.

Striking Resemblance of Reich Blood Test to Recent Graphene Oxide EMF Blood Samples

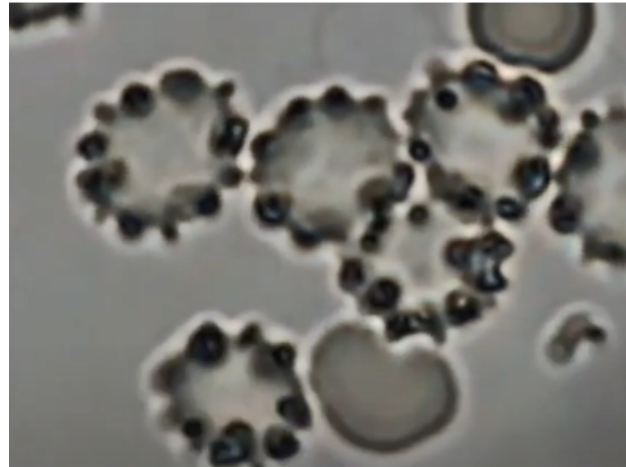

The most striking study in light of recent discoveries of graphene oxide can be found in the “Reich Blood Test (<http://wilhelmreich.gr/en/orgonomy/orgonomy-and-medicine/reich-blood-test/>)” performed by the [Heraclitus Microscopic Research Laboratory](http://wilhelmreich.gr/en/institute/activities/). In this test, they show the effectiveness that orgone energy has on the blood. They took two blood samples and put one in a control box and the other in an orgone energy box. Over

When a red blood cell has defects and starts to die, they can develop something called Acanthocyte formation, where multiple spiky like projections of varying lengths protrude from the cell. The pictures below show what it looks like when a blood cell dies.

Reich Experimental Blood Test – Blood Disintegration

Decaying blood cells forming into what Dr. Reich called "bions" from the Reich Blood Test work done by Hericlitus Labs.

ORGONE ENERGY BLOOD TEST

Orgone Energy Blood Test, 30 September 2020 (23 mins)

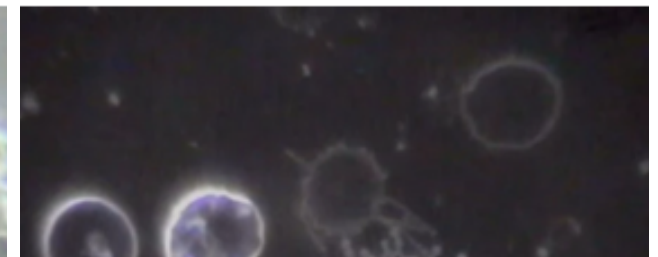

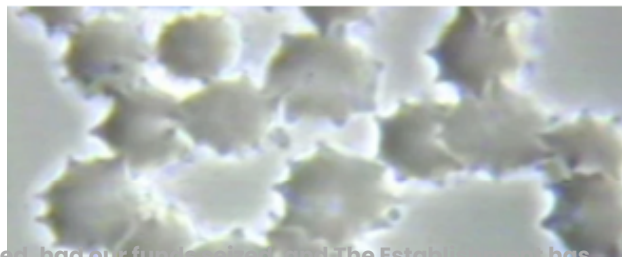

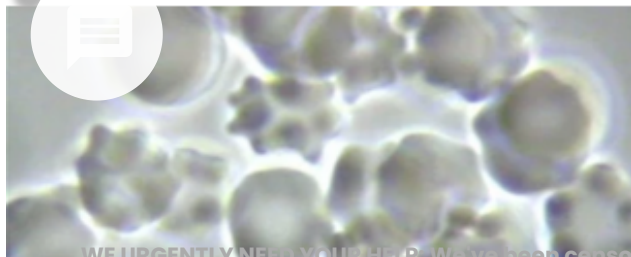

These slides above are showing the bionic disintegration of living and non-living matter. The healthier cell has a more solid membrane with a blue light around it. This blue light is actually the lifeforce or “Aura” of the cell. It is what Dr. Reich called “orgone” energy. As the cell dies and disintegrates, the membrane wall forms spikey protrusions coming out of it.

The graphene oxide-based nanoparticles used in the Covid injections is designed to penetrate the membrane of the cells in order to get the mRNA into them. This constant penetration of the cell membrane wall could be what is causing these membrane deformities. According to *A Laboratory Guide to Clinical Haematology* (<https://openeducationalberta.ca/mlsci/chapter/abnormal-rbc-morphology-acanthocyte/>) at the Open Education of Alberta:

“Acanthocyte formation occurs as a result of either hereditary or acquired membrane defects. Defects that cause an imbalance between the membrane cholesterol and lipid content affect the RBC's ability to deform resulting in more rigid plasma membrane”

Now shown below are three photos taken from recent [updated 1 October 2021] blood work from Dr. Robert Young (<https://www.drrobertyoung.com/post/transmission-electron-microscopy-reveals-graphene-oxide-in-cov-19-vaccines>).

His conclusion is that what we are seeing in these blood cells is from the effect of EMF radiation poisoning, graphene oxide poisoning. He calls the formation of the blood cell membranes the “corona effect” and the “spike protein effect”.

Scanning & Transmission Electron Microscopy Reveals Graphene Oxide in CoV-19 Vaccines

This looks identical to the behaviour of the dying blood cells in the Reich Blood Test experiment. What we are seeing here are cells that have been poisoned and are dying. We also see the formation of the spike protein in the last slide.

A striking discovery is found in the Reich Blood Test that shows how the orgone energy devices slows down, and stops this decay of blood cells. This is showing, at a cellular level, how the orgone energy devices protect the human body from harmful EMF.

The slide below shows the results of the Reich Blood Test. The sample on the left is the one that was inside the orgone accumulator box. The rate of cell death and decay is 5%. The sample on the right is the one that was not in the orgone accumulator box. The rate of decay is 50%. Clearly, the orgone energy is doing something to help preserve the life force and health of the blood.

It sound very interesting The Blod is the lifestream of the virility of the body – My understanding of life here on the planet is that it is half physical and half spiritual. There are things spiritually that you can do by understanding rays effects on the body and you receiving them or letting them pass through you by not putting up a resistance that will store them in your body. It takes the understanding of the power off your bagage in your Soul. This Journey is well worth taking and “fear” is well worth to confront by feeling your emotion involved here. If you do it right! It will vanish and you ar a lot better off. Best wishes Kirsten

They have won, care of your leader Joe (and other politicians in the know behind this), the only way to defeat the vaccines is to have an easy, inexpensive, quick, alternative to the vaccines, which kills the nanoprocesor and nanobots that the vaccines deliver.

Let's start of with step one, get an iPhone with Bluetooth enabled and put it on their arm – if vaccinated, a 10 Digit number (or thereabouts) will show on the iPhone face – I have suggested that an ideal solution, in the short term, is to find an electric fence, which keeps cattle in and grab it with both hands and get a shock through the body, then try the above test again (takes about 1 second to do – the shock makes said person let go quick) no number, theoretically the nanobots etc and parasites in blood have been killed – this is untried and we need feedback, to see if it works and I guess “there is an element of risk too” – this is my idea – don't do it if you have a Pacemaker, for example – if the number has gone, then theoretically the nanotechnology has short circuited and it won't receive 5G transmissions ordering the body to kill itself. My suggestion of the cattle electric fence is a suggestion of how we can find a voltage which gets the job done, more or less?

An alarming number of vaccine recipients suffered from severe and debilitating complications. Growing increasingly concerned, the physician decided to study messenger RNA (mRNA) and

individuals, a unique identification code appeared on her smartphone's screen. Each person seemingly contained an internal technological device. During an interview transcribed by Orwell City, Dr. Brandolino shared her startling findings: Mónica Calcedo: The chip. Is that real or a lie? Dr. Brandolino: It's a nanoprocessor. I say again that it is in plain view for those who want to see the micrographs of the electron microscope study made by Dr. Kalcker. It's clearly seen in the magnification: a small, perfect, quadrangular, precise-edged, metallic corpuscle which is the same as any nanoprocessor in nanotechnology-responsive devices. That nanoprocessor is driven from a 4G Plus or 5G antenna. That is, all G technology is the same. The difference lies in that the packet of information that an antenna can transmit, is much larger in 4G Plus and 5G, 6G, and 7G. All that compact information is handled by a nanoprocessor— in a device which will be just inside our cells. By having Morgellons in the polyethylene glycol, they're self-reproducing, it's self-replicating. But because it's in graphene... Graphene is a catalyst and, as I explained to you, makes that cell resonate with the 5G antenna and the microwaves of human thought. Can you understand that? There's a nanoprocessor driven by a 5G antenna that goes directly to the workings of our brain.

I see your leader Joe, blew a maddy today and said in a fit of rage, he had beaten Big Pharma by giving them Billions of Dollars to make the vaccines – I am afraid that is American truth, beyond my understanding – how do you pay billions of dollars to someone “to beat them”? Please explain?

On the subject of people dropping down dead “all over the place” we human's always like to think there will always be an alternative for those vaccinated, but what if there is not.

What happens if the nanoprocessor driven by a 5G antenna that goes directly to the workings of the brain. sends a signal which kills the brain and the person dies.

What happens if a person's number comes up randomly, one here, one there – people don't drop down dead in a group, but all over the place, not enough to attract attention, but when the numbers are added up, a huge lot of vaccinated, injured and dead people, altogether. The injured should have died, but did not “this” time.

A New Way to Reproduce Scientists are trying to manufacture eggs and sperm in the laboratory.

Will it end reproduction as we know it? AND Scientists might soon be able to create eggs and sperm from skin and blood cells. What will that mean? By Jessica Hamzelouarchive page August 23, 2022 Amrita Marino Scientists might soon be able to create eggs and sperm from skin and blood cells. An embryo forms when sperm meets egg. But what if we could start with other cells—if a blood sample or skin biopsy could be transformed into “artificial” sperm and eggs? What if those were all you needed to make a baby?

How Silicon Valley hatched a plan to turn blood into human eggs A well-connected startup company is trying to rewrite the rules of reproduction.

Conception, a company employing a team of around 30 scientists in Berkeley, California, aims to “turn stem cells into human eggs”

That's the promise of a radical approach to reproduction. Scientists have already created artificial eggs and sperm from mouse cells and used them to create mouse pups. Artificial human sex cells are next.

What if babies are made to order and we existing humans, are of no further use, or purpose and this is our extermination, after all, an ideal brain, would be one that had no understanding or feelings which we associate with being human, which could be modified to order and connected to a computer for whatever its ongoing purpose would be – Just like Solyent Green (without the computers) if you ever saw the movie!!

So, it seems to me that everyone has a choice now, they can decide to wait for their number to come up and drop down dead, or they can short out the nano technology and parasites inside them (with a small element of risk) and check frequently for the first few weeks to make sure their number does not come back – it it does, same treatment again, is my take on things.

Where the Graphene Oxide in the vaccines aids nanotechnology to transmit signals in the body, the same Graphene Oxide would act with its transfer capability to short out the nanotchnology, which relies on the bodies own electricity to function, at a much lower voltage.

"quick, alternative to the vaccines, which kills the nanoprocessor and nanobots that the vaccines deliver."

It looks there is one, at the end of he video there is a drawing explaining how to build it.

Frying intracorporal nano and micro routers (EMP)

<https://www.brighteon.com/34b1dc95-6c1a-4c35-b98c-012a47060e5a>

(<https://www.brighteon.com/34b1dc95-6c1a-4c35-b98c-012a47060e5a>)

By the way, I think the MACs are disappearing. A couple of days ago I wrote a comment to an older article about it, and I think I was wrong, the app. Bluetooth scanner, you have to clear the result before starting a new measuring and I didn't.

It means that compared to half year ago I see far less MACs now, especially on abroad, I would say only even half the people present have MACs.

I don't know the reason but hope that it means that the tech – without graphene oxide boost – degrading and stops working after a time like one year maybe.

Several years ago I read an article which Said they could created speemcells from skin. According to military sources every technology has been secretely used for att läst 50years before it is made publish.

Therefore I think that both clones and cyborgs etc already has been around is a while.

Book of Revelation says “they made an image and gave it a spirit (thoughts) so it could speak” which speaks of cloning etc.

About saving you from the effect of material that contaminate your Brain waves you must keep God's commandments which are electricall “waves” from Words that cannot be affected by man made things

Do you know how much Graphene Oxide is in your blood now: Jim Woodgett, former Director of Research at Mount Sinai Hospital (2005-2021) Answered May 5, 2021 (Quora). The SARS-CoV-2 Spike protein encodes a 1273 amino acid protein. Multiple by 3 to get the number of nucleotides and add some untranslated regions for directing translational start and aiding in stability it rounds to approximately 5,000 nucleotides. 1 nucleotide of RNA has a mass of (averaged) of 320 Daltons. So an RNA comprised of 5,000 nucleotides has a mass of 1600

shot, 11,300,000,000,000 molecules of RNA (11,300 Trillion) approximately. The Moderna shot typically uses more RNA. Erwin Claassen, Wetenschappelijk Huurling at Waar Niet Answered May 5, 2021 (2nd Shot) a shitload... dose is 100µg of mRNA (not all vaccines is mRNA), that is around 505.440.000.000.000.000.000.000 copies... more or less (505,440 Trillion Trillion) Richard Noakes says: So if you have a 3rd booster that might translate to a further 1,010,880 Trillion, Trillion, Trillion Graphene Oxide mRNA particles in your body, delivered there in the Lipid package, which fools the blood brain barrier, into letting it into the workings of your inner body system and total blood supply, 4th and 5th vaccine shots – I have not computed. However, this is probably more Graphene Oxide than you have red blood cells

There is a suggestion that there are no mRNA particles in the vaccines and there never were – you were just told that, to assume that there was a cure for something that did not need an mRNA vaccine to begin with, by assuming that the mRNA was a cure

Dr Nagase in New Zealand. He analyzed the elements present in the vaccines and found only graphene and oxide and some metals, but no phosphorous nor nitrogen, which are both necessary for anything biological on this planet.

I am aware of it. There is no proof for mRNA, but some shots (batches) can have it, they were very different, they could try many things like the hydra like stuff in some.

This part – mRNA – is important because if you carry – if you are now GM – then you are a property of someone – I read an article rather long time ago that lying about it is to 'register' you as a property (slave of someone) based on the gene modification and that if everyone believes it, they don't need to prove that it really happened. One thing is sure, the golden source of information – who didn't lie so far – is La Quinta Columna and they didn't find proof for mRNA but for graphene.

The info is part of this interview:

You are correct that Pf=12 trillion LNPs, not sure where you get that Mod no. from – it should be 40 trillion LNPs. Do you mean the number of spikes produced by the mRNAs? If it were that many, non of the jabbed would be above ground.

the vaccinated are emitting radiation in the bluetooth range, in my opinion this is not a real sneezing (except maybe in the case of very close contacts sharing body-fluids), they made me sick several times for a couple of days, but I never was magnetic (sign of graphene in the body), I think they did it with that bluetooth radiation (I am EMF sensitive).

graphene oxide (nGO), but in reality this topic seems to not be addressed at all. What this article is actually about is how to counteract the negative health effects of nGO on the human body.

I am not trying to say that the goals that this article attempts to achieve aren't beneficial because of course they are, but counteracting health effects and actually accomplishing removal of nGO are not the same thing. Nothing within this article even attempts to verify that any of these recommendations successfully remove nGO.

How about someone doing some before and after measurements that quantify the levels of nGO for any of the various types of treatments suggested by this article (which is mainly supplementation), or maybe for some other treatments like ozone treatment of the blood or intravenous high dose vitamin C?

Is there even an assay method that can quantify nGO levels in the human body? If not, then why not tell us that as well?

Is this an area where PEMF therapy might help, do you think? (Pulsed Electromagnetic Field therapy). Apparently it can be of use in preventing and dissolving blood clots (according to what I've read, at least – I'm no expert) but I don't know whether it would have any effect on specific substances in the blood.

Which part? I don't know about orgone energy, but as the rest... you can influence your body influencing the water (structure), as you are 70-80% water it does matter.

<https://www.youtube.com/watch?v=0IA5C5n9yfc> (<https://www.youtube.com/watch?v=0IA5C5n9yfc>)

The problem is the radiation and its proven effect to mess with the water' structure, you can find articles about it with experiments like Firstenberg's when watering plants with water close to a wifi.

Columna (R. Delgado), nicotine also till some level (do you remember? they didn't understand why smokers were less tend to get 'Covid') and smoking now banned on many open places (eg beaches). Till some level alcohol, too (Russians suggested not to drink 2 weeks before and 2 weeks after their 'vaccinations', I know someone who drank a lot after it, he felt very badly after that and two more months long but never had a MAC and now he is well)

As about other stuff, I bought a Q-Shield long time ago, they demonstrated with lab result that in the presence of it wounds heal faster even if there is a wifi around. It modifies – I think – the electric charges in a good way. I sleep far better with it even in hotels when I can't avoid wifi radiation.

I also use EMF shielding clothes, they are mainly silver-fiber and they work. I would assume that for a vaxxed it is more important at least till as long as they can get rid off the graphene.

According to Mark Steele, it should be tested by magnet, if you are not magnetic anymore you are ok.

I am not vaccinated against so called covid19. I love living natural and taking care of myself as much as possible. I transformed covid restrictions to make better myself. I joined gym, started researching healthy ways to live and researched what is behind this covid nonsense thanks to lots of free time that they give us by ordering to stay at home. It really opened my eyes and I don't see the world as I see in 2019. Ivermectin is bashed even though doctors have proven that it works. You can take care of your entire self by visiting <https://ivmpharmacy.com>

Great article.

I have much reason to think that Chanca Piedra (stonebreaker and blood thinner and general antioxidant) should seriously aid in flushing Graphene Oxide also. Affordable and well worth taking in addition if you have been jabbed even once.

Thanks for another informative and very useful article. Interesting to see the link up to Reich's work. I recall Reich warned about using Orgone devices in areas with strong electrical fields. He found such fields could turn orgone in to 'deadly orgone'; also referred to as 'DOR' or 'Oranur'.

[1]

It would be worthwhile checking on those points and add some notes to the report. It wouldn't be good if people start using orgone device in areas of high electronic pollution and if that accelerates their demise.

[1] Refer to Section 8 of James Demeo's booklet, "The Orgone Accumulator Handbook" . I recall I found a PDF of it via Academia.edu

This might not be a panacea; however, grounding to the earth increases blood velocity by a multiplier of nearly **three** without the heart having to do any extra work. Red blood cell **clumping** is also decreased by the same factor. This can be done cheaply and safely, in fact grounding is likely the safest/cheapest therapy on the planet. In addition to this the trillions upon trillions of electrons taken up by the body also act as antioxidants. Yet no-one, even the enlightened docs, mention it (except maybe in passing):

Graphene oxide is tough and durable. That's why it's becoming more commonly used. It would be extremely difficult your body to get rid of it. Furthermore I doubt very much that it is the only metal that is used in these shots. I am sure other metals such as lead, mercury and aluminum are present in high quantities.

What to me at least seems hopeful is Zeolite because it deals with actual removal of graphene oxide from the body. Graphene oxide is positively charged and Zeolite has a negative charge thereby attracting the metal. Zeolite also has honeycomb like structure which traps it so it can be discharge by the body. Zeolite also seems to be useful in removing other heavy metals.

There doesn't seem to be a lot studies out there but it does seem promising.

I have used it myself. Felt great after.

Anyway believe it's worth while looking into..
